

Training Module 3: Literature Search and Management Module

The Literature Search and Management Module is designed for postgraduate students at Superior University who are looking to improve their research skills by effectively searching and managing literature. The session aims to provide practical training on using tools such as EndNote and Mendeley for literature search and management.

Objectives:

1. To introduce students to the importance of literature search and management in academic research.
2. To provide practical training on using tools such as EndNote and Mendeley for literature search and management.
3. To teach students how to organize their literature search results and manage references effectively.
4. To enable students to use these tools to create and format bibliographies accurately.
5. To equip students with the skills and knowledge needed to conduct effective literature reviews for their research projects.

Learning Outcomes:

1. Students will be able to identify and access relevant databases and resources for literature search.
2. Students will be able to use tools such as EndNote and Mendeley to manage and organize their literature search results.
3. Students will be able to create and format bibliographies accurately using these tools.
4. Students will understand the importance of literature search and management in academic research.
5. Students will be able to conduct effective literature reviews for their research projects, using the skills and knowledge gained during the training.

Trainers:

1. Mr. Qasier Iqbal, Chief Librarian, Superior Information Resource Center (SIRC)
2. PG Program Leaders

Venue:

Superior Information Resource Centre

Lab 1, 2, 3

Duration:

3 hours

Assignment 3: Write Research-based blog at Linked-in on the topic of your interest as Superior PG Student.
